

CONDIBOX TUNNEL

World Class
Conditioners
and Heat-
Setting
Machines.
Made in Ger-
many.

CONDIBOX TUNNEL: TECHNOLOGY AT ITS BEST

2- DOOR- TUNNEL

CONDIBOX TUNNEL is the version with 2 doors for manual or fully automatic operation with pin trucks or pallets. The machine design is made according to customers needs in any configuration.

MANUAL TUNNEL OPERATION

The TUNNEL machine has the advantage that there is no mixing up of conditioned with unconditioned yarns.

Using 2 doors, operators separate automatically the conditioned yarns, avoiding possible downstream problems in yarn dyeing and consequential customer complaints.

PACKTRACK: FULLY AUTOMATIC HANDLING

THE FUTURE IS AUTOMATION

Automation means reliability of production and quality of your products. PACKTRACK are fully automated conditioning and packing systems, where the pallets are weighed, the identification tickets are printed and the ready pallet is wrapped. An automatic transport into a warehouse or integration into existing packing lines can be also engineered.

OUR PROFILE

1856: FIRST IN BUSINESS

WELKER was founded in 1856 by Philip Welker, and is therefore, one of the most traditional suppliers for the Textile Industry. In the early 40's, WELKER started with the manufacturing of felt washing machines, paper processing machine lines with roller fulling and hammer die cutting machines.

In 1941 and the first generation of vacuum steaming equipment was developed and successfully introduced to the market. WELKER systems are installed world wide and are applied in all areas of heat-setting, conditioning and drying.

CONDIBOX Blue Line

BLUE LINE

WELKER BLUE LINE technology is available for all WELKER machines. BLUE LINE is the true contribution to reduce of the consumption of energy and the waste of water in the conditioning technology. Please check our website.

CONDIBOX

Leading product for conditioning and heat-setting up to 105°C.

Unique technology with PREVAP and COOLVAP to achieve moisturisation up to +3%.

CONDIBOX GFY

Leading product for conditioning and drying of GFY.

VAPOMAT

Leading product for conditioning and heat-setting with temperatures up to 180°C in large scale.

PICCOLO

Leading product for conditioning and heat-setting with temperatures up to 180°C for 100, 200 and 300 kg batches in standard trolleys.

ROVEMASTER RM 8

With 8 rolling heads the new RM 8 is the leading roving bobbin cleaner in the market. The fibres are entirely opened and disposed in a transport truck.
