COCAMAR, BRAZIL

High efficiency WELKER WATERFREE pumps provide 95% vacuum (50 mbar) in approx. 6 minutes without using water, thus protecting the environment.

COCAMAR COOPERATIVA AGRO-INDUSTRIAL located in Maringá. Brazil is one of the largest and most important cooperatives of Brazil. Apart from textiles, COCAMAR produces a large variety of processed agricultural products such as coffee, concentrated fruit juices, soybean products, vegetal oils and others.

The project of implementing a modern conditioning plant did not only focus on pure production criteria but also on environmental, safety and handling.

Easy loading on the chain transport system ensure high work place safety standard.

The decision was made for a fully automatic CONDIBOX TUNNEL installation with two doors and automatic loading and unloading system.

The equipment includes also new SUPER-ECOSYSTEM and WATERFREE vacuum pumps to save energy and water.

Cocamar Cooperativa Agroindustrial
Estrada Oswaldo de Moraes Corrêa, 1000
